

Automatic station  
for pay-to-park  
facilities

# PCS6000

## **“Easy” parking with the new automatic pay station**

The PCS6000 is the latest automatic pay station designed to be integrated into Came's parking systems.

It takes coin, banknote and credit card Payments, but it is also possible to use transponder devices to easily manage memberships.

Made of sturdy steel plating, it offers top anti-effraction security.

AUTOMATIC GATES

# The software

The multilingual touch screen an exclusive service

NEW

It features quick, user-friendly interface, to easily manage payments with touch screen. The possibility of customisable configurations makes PSC6000 a functional and exclusive paystation.

The service is completed by a "diagnosis through real time sms" function. The administrator can therefore check the status of the system.

## The functions

- > **Multilingual menu**  
with a good 9 possible choices.
- > **Coin reader**  
It is programmable depending on the type of coin used in the country where it is installed.
- > **Banknote reader**  
It is programmable depending on the denomination of the banknotes in the country where it is installed.
- > **Credit Card reader**  
VisaPED certified, with credit card in full view.
- > **Notification during payment operations**  
of reached missing and change amounts.
- > **GSM Diagnostics**  
with real time system status checking mode.
- > **Possibility of interphone connection**

- > **Membership management**  
through cards, TAGs or transponder keyfobs, which can all be recharged directly at the register.
- > **Service Messaging space**  
on the monitor, for the client.

### Solid construction.

The cabinet is made of steel plate and treated against rusting and painted with electro-static powder varnish. The openings are protected by two 4-point locks for maximum security.

### Touch screen.

The station works thanks to a simple, intuitive software, that is available on a user-friendly touch screen. The client can select the language among a good 9 possible choices.

### Two different models.

PSC6000 is available upon request with or without the credit card reader.

### Coin change.

The system can receive banknote, coin and credit card payments. It can also give change in coins, up to a predetermined maximum amount.
