

LUMINA

All Glass Sliding
Automatic Doors

When the alliance of
technology
and **aestheticism** gives
birth to
a delight..

Light, sobriety, purity... are the main characteristics of these "All glass" doors. They are especially appreciated in buildings and locations where you want to bring comfort and safety to your customers while enjoying a bright and elegant entrance.

...**All glass** sliding automatic doors with a design quality thanks to its **light** and **elegance**.

The LUMINA range

All Glass Door

Sliding leaves hold with pliers, guide on the ground.

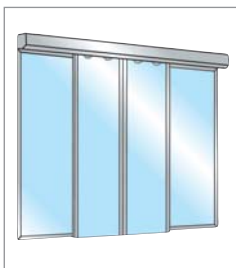

Glazed fixed leaves with high and low crossbars.

All Glass Door

Sliding leaves hold with crowbars, guide on the ground.

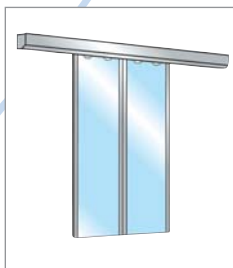

Without fixed leaves.

Sliding leaves with vertical jambes

Glazed fixed leaves with frame

Airtightness between fixed and sliding leaves.

Sliding leaves with vertical jambes Without fixed leaves

Airtightness between sliding leaves and posts.

Discover all the facets of the LUMINA door ...

The LUMINA Automatic Door is made of a DIVA or DIVA L operator which control the operating of sliding leaves.

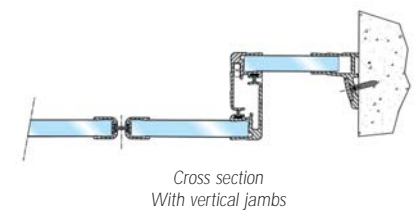

The set can be installed with or without fixed leaves, and the glazing can be "bare" assembled or combined to thin aluminium profiles which ensure an hermetic closure of the door.

In the "All Glass" version, the glazed bay gives a whole transparent facade effect all along the bay. It is a convenient solution for the architects who look for the biggest possible bay or a very thin aluminium structure.

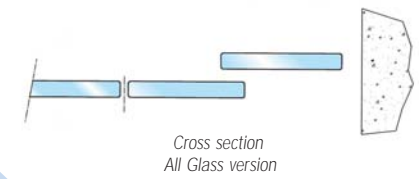

In the version "Glass combined to profiles" the door is equipped with brush seals between sliding and fixed leaves or sliding leaves and posts, which ensure the door airtightness.

The glazing is Securit glass made of well known for its shock resistance.

In the standard version, the operator casing and possible profiles have clear anodised finish. These elements can also be covered with numerous finishes (RAL lacquering, other anodised colours, special decorations) A wide choice of detections and safeties are possible to bring the best solution to your project.
